

Accelerate the Integrated Value of Office 365

Alitek **FastTrack Framework** for the Extended ECM for Office 365 Cloud Platform

OpenText's premier partner, Alitek, has developed a rapid framework to enable the Extended ECM for Office 365 integration with OpenText's Cloud. Alitek's fixed-cost offerings provide all the benefits of an expert-level deployment while minimizing the risks of expanded scope and timelines.

Explore.

Using electronic questionnaires and focused fundamental workshops, Alitek identifies specific functionality to cater to unique business requirements.

Design.

Deriving out of the Explore phase, Alitek develops a technical platform with a functional specification model to enable maximum capabilities for each deployment.

Build.

The design specifications are then used to configure and deploy the integrated cloud platform between OpenText Extended ECM and Office 365 to each deployments capabilities.

Validate.

The technical integrated framework, as well as the functional components are validated with identified business stakeholders to ensure all expectations and requirements are met.

Support.

The initial deployment includes a warranty period to maximize your investment in the Extended ECM for Microsoft O365 and the OpenText Cloud.

Deploy the combined power of Office 365 and the OpenText Cloud with Alitek's proven success.
